**HiSC Product  
Verification Services**

## ● HiSC offers a variety of exacting compatibility checks on demand, on call or on guard.

### ● HiSC Multi-OS experience ...

HiSC is a multi-platform software team with many years of experience testing and verifying the compatibility of high performance code.

We are test-fluent in a wide variety of today's most popular operating systems, including:

- Windows,
- Apple Macintosh (including Mac OS X),
- Unix/Linux.

### ● We know software security ...

#### So many variables ...

- We are experienced with Public Key Infrastructure, Verisign certificates, SSL, PKCS-7 and PKCS-11.
- We conduct S/MIME compatibility testing using different operating systems, certificates, and email applications.

### ● We even make our own tools ...

- We have the ability to create our own testing tools in order to enhance and automate the testing process whenever possible.

### ● API Testing...

- We often test APIs and can create automated test applications for just that purpose.

# HiSC Ltd.

### ● Testing 1... 2 ... 3 ...

While your product and code are being developed, we can simultaneously design test plans from the same set of spec sheets.

Over the years, we have become very experienced in testing;

- desktop applications
- server-based applications
- web-based applications
- different plug-ins and other components.

Part of our normal working procedure is to track, record and inform the client of every bug.

### ● HiSC will keep on testing ...

Technology standards have proven to be ever-changing.

We can be your "early warning system" to guard your product against these new demands. We can work with you on either a pre-scheduled or on-call basis to ensure your code stays robust and compatible.

### ● HiSC Multi-benefits ...

#### Shared objectives ...

- Once a client's project objectives for both performance and functionality have been defined, they become our objectives.

#### From start to finish ...

- We can take your project from concept to Golden Master CD with any amount of supervision you specify.

#### Take advantage of our investment ...

- We will continue to acquire the latest hardware and software in order to remain up-to-date and relevant.

#### Standing on guard for thee ...

- We can continue to check for compatibility as platforms and programs evolve.

#### Backup, backup, backup ...

- We provide full resource redundancy (both people and systems) to ensure minimal interruptions and continuous service.

#### Special expertise ...

- We have extensive knowledge of the Mac OS X and special access to professional Apple resources. We have a large network of contract testers with additional levels of expertise and skills ready to enhance our team if needed.

#### Compatible teamwork ...

- We will work with your processes, keep within your budget, and meet or exceed all your pre-defined project expectations.
