“From first-hand experience, we can enthusiastically recommend HiSC as a software development expertise supplier to small and medium-sized companies.”

Steve Denison,
CEO, SoftCapital

**Creating
Compatible Code**

Contact us today to discuss how we can apply our skillsets to best augment your project team.

**HiSC Research &
Development Services**

● HiSC creates code that is compatible with your objectives, your process and your budget.

● HiSC Multi-OS experience ...

HiSC is a multi-platform software development team with many years of experience creating high performance compatible code. We are code-fluent in a wide variety of today's most popular operating systems, including:

- Windows,
- Apple Macintosh (including Mac OS X),
- Unix/Linux.

We are also familiar with many of the leading programming tools, protocols and environments, including: C/C++, Visual C++, Visual Basic, Java, XML, HTML, TCP/IP, LDAP, AppleTalk, SOAP, Windows Networking, SSL and S/MIME (PKCS-7).

● Many companies have made HiSC their "first choice"

We are the prime programming resource for a variety of companies including those in the worlds of

- Software Security Applications (Encryption/Decryption, Security toolkits for 3rd party application developers, and S/MIME (PKCS-7) plug-ins for email applications)
- Asset Management Applications
- Electronic Form Design Applications
- Business Intelligent Applications
- Network Monitoring Applications
- Terminal Emulation Applications (3270 terminal emulation, VT-100 etc., and Automation connectivity script engines)
- Desktop Publishing Applications

HiSC Ltd.

● HiSC Multi-platform lab teams ...

Our well-equipped facilities are run by a skilled team of full time programmers who use the latest in operating systems and software tools. Whenever the workload requires, our home team is augmented by accessing our international network of skilled contract developers.

● HiSC Multi-deliverables ...

Project & Product Management.

- With a hands-on approach to match your needs.

Product Verification.

- Finding out the truth, fulfilling the promise.
We provide you with sound and fully-tested products.

Documentation Services.

- Full project history to exacting standards, including user's guide and artwork as required.

Training Services.

- Bringing your people up to speed.

Customer & 2nd Level Support.

- Answering questions, alleviating confusion.

● HiSC Multi-benefits ...

Shared objectives ...

- Once a client's project objectives for both performance and functionality have been defined, they become our objectives.

From start to finish ...

- We can take your project from concept to Golden Master CD with any amount of supervision you specify.

Take advantage of our investment ...

- We will continue to acquire the latest hardware and software in order to remain up-to-date and relevant.

Standing on guard for thee ...

- We can continue to check for compatibility as platforms and programs evolve.

Backup, backup, backup ...

- We provide full resource redundancy (both people and systems) to ensure minimal interruptions and continuous service.

Special expertise ...

- We have extensive knowledge of the Mac OS X and special access to professional Apple resources. We have a large network of contract developers with additional levels of expertise and skills ready to enhance our team if needed.

Compatible teamwork ...

- We will work with your processes, keep within your budget, and meet or exceed all your pre-defined project expectations.
